## Custom Designed to Meet your Specifications!

BellBoy™ Interactive Concierge Information Kiosk solutions are based on the Comvox Digital Signage, Advertising Engine and Kiosk Design Studio. Utilizing rugged professional interactive touch screen displays, available sizes range from 32" to 80", and are manufactured by Panasonic, NEC and Sharp. Creative is cached, updated and requested content managed by a small, fully developed Windows based Shuttle 1080p high definition video player computer mounted on the rear of the display.

Based on the Comvox.TV Digital Signage Studio, this truly robust method of presenting truly dynamic interactive kiosk style content, designed to meet your specific guest concierge objectives. Your BellBoy lobby sign utilizes many of the extensive media resources (outlined in the side listing) currently available within the Comvox Signage development tools.

The Comvox.TV digital signage studio will also allow you to bring your BellBoy sign to your website, making it accessible to guests in the comfort of their rooms. All content and interactive options function as if the guest is standing in front of the display in the lobby.

Event displays are also available for meeting room areas, as well as specific meeting designation displays for outside each of the meeting rooms.

Go to [www.Comvox.TV](http://www.Comvox.TV) and click on the Tutorial tab for a thorough overview of the capabilities of the Comvox Digital Signage Studio.
